# GV-Pad

Introduction

The GV-Pad is a pad that decodes and displays incoming IP streams from GeoVision and third-party IP devices. It is light-weighted and requires only minimal amount of installation. As a standalone device, the GV-Pad does not require an extra monitor and yet it supports almost all the features of a GV-IP Decoder Box. Through the network, a GV-Pad can receive and manage up to 64 IP streams simultaneously. The administrators can monitor channels, take snapshots, pause at a specific channel and control GeoVision PTZ cameras such as GV-PTZ010D, GV-PT110D and GV-IP Speed Dome through a connected GV-Joystick.

Features

- Decode video streams in H.264 codec at a maximum frame rate of the IP device
- Decode up to 5 megapixel IP cameras
- Decode up to 64 IP streams
- Support for 3rd party IP cameras that adhere to RTSP, ONVIF or PSIA
- Support for 10/100 Ethernet over LAN
- Support for single and sequential display
- Support for GV-Joystick control of GV PTZ cameras (GV-PTZ010D and GV-PT110D) and GV-IP Speed Dome
- Support for remote firmware upgrade, IP address configuration and addition of new channel
- Display of Matrix view through GV-Mobile Server
- IR remote control
- SD card and USB drive for snapshot storage and firmware upgrade

* No SD/SDHC card slot & local storage function for Argentina.

Compatible Devices

The GV-Pad is compatible with:

1. Most GeoVision IP devices (of the indicated firmware versions) using H.264 codec, and

2. Third-party IP devices that support H.264 and adhere to RTSP, ONVIF or PSIA.
