

CMS Lite

Introduction

The CMS Lite is Content Management System, allowing you to remotely upload slideshows, media files, scrolling tickers or firmware to multiple [SQP110](#) series or [PN300](#) devices.

Key Features

- Network connection to PN300 & SQP110
- Remote content upload
- Remote schedule update
- Remote device reboot
- Remote firmware upgrade
- Remote scrolling ticker creation
- Instant display of device status
- Remote device name editing
- Support for Dynamic DNS

Additional System Requirements

The CMS Lite supports 50 units of SQP110 series or PN300 devices for free. If you want to connect more SQP110 series or PN300 devices to the CMS Lite, an additional dongle is required. Different number of connections is available for purchase, with 10 connections for every increment and up to 500 connections in maximum.

USB Dongle
